

The above-average rainfall this monsoon season has flooded several parts of Pakistan, especially in poor rural areas.

SHINE started off as a disaster relief organization and played a very significant role in the rehabilitation process after the 2005 earthquake and 2010 floods in Pakistan and the aftermath of the Tsunami in Japan. Over all, our disaster relief efforts have impacted more than 400,000 lives since 2009.

Flood Relief Action Plan 2022

SHINE is setting up multiple Medical Camps for a period of 6 months, in close proximity to the displaced flood-affected population. These camps will have fully designated teams, comprising of a physician, dispenser, nurse, and medical volunteers to run and manage the large influx of people expected.

Camps Conducted So Far

SHINE has conducted medical camps in different areas of Thatta including Gharo, Ubooro Jakhro Matka Darya Stop & Makoro Malaha, Filter Market, Abdullah and Sidhu Panwar, Damdama Stop, Sujawal and M.Siddique Solangi Bello Village, Allah Dino Malah and Monarki Bund. Our method is to provide relief on the go, along with setting up a proper tent with different stations (disease and patient inflow wise) where possible.

So far, we have treated around 1105 patients, the majority of whom presented with water-borne diseases, including skin infections, gastro and stomach-related diseases, eye infections, and respiratory illnesses.

SHINE plans to go to further areas and provide medical assistance to as many people and villages as possible. Makeshift tents are a hassle to carry around and erect every time we visit a small village, so we will be constructing a 20-foot container specifically for the camps. This will be mobile and can be taken to areas where needed. This container will have our medical staff (doctors and nurses) and medicines.
